

PCSoft cloud for sending emails: Pricing

Effective date of pricing: August 1, 2026

Overview

PCSoft's cloud solution enables you to send all your organization's emails. All the messages sent by the SMTP server will use the specified domain name.

You can also check blacklists on a daily basis.

Service description

High-quality, ready-to-use environment

Cloud-based email platforms are preconfigured as follows :

- Linux operating system (Debian 12).
- 1 IP address and 1 domain name to access the platform's SMTP server.
- 1 SMTP server.
- Secure email delivery using modern standards (DKIM, SPF signature, DMARC, etc.).

An administration interface lets you configure the domain to be used for mailings, enable and disable various options and restart the platform if necessary.

Availability, scalability, security

Email platforms are designed to guarantee high availability, even in the event of hardware failure.

A backup option can be enabled to perform a daily backup of your platform (see "Platform backup", page 2).

Adapt the operating platform to your requirements

There are five types of platforms: Bronze, Silver, Gold, Platinum, Diamond.

Each platform can then be configured to meet a specific usage level. This involves modifying the platform's physical resources (CPU/RAM).

Platform billing

Usage-based pricing

Each platform type (Bronze, Silver, Gold, Platinum, Diamond) can send a certain number of emails per month. When the limit on the number of emails sent is reached, additional emails are billed individually.

The table below shows monthly prices by platform, based on the number of emails sent :

Platform	Monthly price (Euros)	Number of emails	Price for 1 additional email (Euros)
Bronze	29	5 000	0.0023
Silver	59	20 000	0.0012
Gold	89	50 000	0.0008
Platinum	119	500 000	0.0006
Diamond	149	1 000 000	0.000115

All prices are exclusive of taxes and are subject to change without prior notice.

Note: If you change to a different during the month, the price of the initial platform will be applied for the current month. The price of the new platform will only be applied from the month following the change.

Blacklist verification

You can enable a daily blacklist check option to check over 200 blacklists.

Option	Price (Euros/month/platform)
Daily blacklist check	17

All prices are exclusive of taxes and are subject to change without prior notice.

Platform backup

You can automatically back up the email platform.

This backup is performed daily, and data is kept for 14 days. This gives you 12 daily incremental backups and 2 weekly full backups.

This backup is performed on a physical machine independent from your platform..

This option can be enabled directly from the Dashboard.

To restore a backup, please send a request to our technical support.

The table below shows the price of the email platform backup and restore option :

Backup/Restore	Price (Euros)
Automatic daily backup	13,99/month/backed up platform
Backup restore	59.90

All prices are exclusive of taxes and are subject to change without prior notice.

Data transfer billing

Data transfers correspond to incoming data streams (upload) and outgoing data streams (download).

The sum of data transfers is billed per month.

The table below shows prices for data transfer (download and upload) :

Data transfer/month	Price (Euros/GB)
Bronze platform: 10 GB	Included
Silver, gold, diamond or platinum platform: 100 GB	
Per additional GB	0.07

All prices are exclusive of taxes and are subject to change without prior notice.

Setup and assistance fees

Opening a Cloud account generates a one-time fee that covers setup costs.

A single Cloud account allows you to create development platforms, operating platforms, telemetry platforms, email platforms and cluster platforms.

Therefore, you don't need to create a new Cloud account if you already have one.

Creating a platform implies a one-time fee that covers the assignment of a pcscloud.net subdomain and the setup of the platform.

Suspending and resuming an activity on an existing platform does not incur any setup fees.

Setup / Assistance fees	Price (Euros)
Opening a Cloud account	9.90
Creation of a new email platform	19.90
Customized assistance	115
Priority assistance	145

All prices are exclusive of taxes and are subject to change without prior notice.

Management fees

Management fees correspond to 20% of the monthly subscription fee associated with the different options, if any (platform, backup, etc.). These management fees are payable monthly.

All prices are exclusive of taxes and are subject to change without prior notice.
